Holistic Heart Care

Having born in the prestigious Kongu belt in Erode, I did my undergraduation from Madurai Medical College and went on to do MD General Medicine in Kasturba Medical college, Mangalore (MANIPAL University) and completed my Doctorate of National Board (DNB) in Cardiology from GKNM hospital, Coimbatore.

Being an Interventional Cardiologist, with a good exposure in performing >2500 Coronary angiograms and >800 Complex Coronary Angioplasties and worked in many Premier Cardiac Institutes, I'm very happy and proud to come back to my hometown to join Lotus hospital, Erode to start and serve my own people in one of the best Multi Speciality hospitals in the City.

I always focus myself as a "Cardiac Physician", who approaches the ailment as a physician and then consider interventions when indicated.

Over the years, I've learnt that Cardiac therapeutic advances has to be always used based on the patient's appropriate symptoms & the benefits that accrue with the procedure, rather than treating the disease alone.

My principle is to treat the "Patients with cardiac diseases" as a whole, addressing and allaying their fears, rather than treating the Cardiac diseases per se.

"Prevention is always better than cure" stands very true in terms of Cardiac diseases. Coronary angioplasty is just a single step in repairing Cardiac diseases. Cardiac drugs are mainly meant only for controlling the diseases, till the core causes of those diseases are diagnosed and controlled. Despite treating the diseases to control it, addressing the Core cause of Cardiac diseases such as Obesity, Smoking, Lifestyle diseases such as Hypertension, Diabetes, High cholesterol etc forms a vital element of the treatment process.

Complete evaluation + Cardiac drugs/Procedures + Lifestyle modifications = Holistic Cardiac Care.

Lifestyle modifications such as weight reduction, regular physical exercises, Cessation of smoking etc forms an important component in the course of treatment. This forms the basis for our "Holistic Cardiac Care" approach.

Dr.M.Jagadeesh, MBBS., M.D (Gen Med), DNB (Cardiology)
Consultant Interventional Cardiologist,
Lotus Heart Centre, Lotus Hospital - Erode

Features of Philips Azurion 5C12

- ❖ Very Low Radiation
- ❖ High Resolution
- ❖ Excellent Image quality
- ❖ High Precision
- ❖ Superior Performance
- ❖ Adult and Pediatric complex Interventional Procedures can be performed quick with ease.
